DETAILED ACTION

The following is responsive to Applicant's amendment received Aug. 5, 2002.

Claims 1-75 are cancelled.

New claims 76-171 are added. Claims 76-171 are presented for prosecution on the merits.

In view of Applicant's amendment, the following restriction requirement is being submitted hereinbelow. Applicant's amendment necessitates the following restriction because it introduces claims which were previously withdrawn from consideration and not further treated on the merits due to the fact that those claims were improper multiple dependent claims.

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 125-132, 134-171, 76-124, drawn to a method of treating a patient and pharmaceutical compositions, classified in class 514, subclass 727.
 - II. Claims 133-171, 76-124, drawn to a method of treating septic shock or other conditions responsive to alpha1-receptor stimulation, classified in class 514, subclass 727.
2. The inventions are distinct, each from the other because of the following reasons: Groups I and II are patentably distinct because the methods in both groups require the treatment of

Art Unit: 1614

individuals suffering from different disorders. Each method requires different method steps and has different results.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Claims 125 and 133 are generic to a plurality of disclosed patentably distinct species comprising orthostatic hypotension, syncope, urinary incontinence, urinary stress incontinence (Group I, claim 125); septic shock or "other conditions responsive to alpha1 receptor stimulation (claim 133, Group II). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. If Group I is elected then Applicant must elect a specific condition, for example, "syncope". If Group II is elected then Applicant must elect either "septic shock" or a specific condition "responsive to alpha1 receptor stimulation.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1614

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cybille Delacroix-Muirheid whose telephone number is (703) 306-3227. The examiner can normally be reached on Tue-Fri from 8:30 to 6:00. The examiner can also be reached on alternate Mondays.
